

Inorganic Feed Phosphates (IFP) Sector Group Vision, Mission and Objectives

Vision

Excel in producing and supplying high-quality and sustainable inorganic feed phosphates that are essential to enable our customers to efficiently feed the world (excellence)

Mission

IFP mission is to promote and defend the interests of the European inorganic feed phosphate producers in a coordinated approach within and outside of the EU.

It builds trust in promoting the use, quality and digestibility of inorganic feed phosphates, as well as the overall sustainability of the sector.

Scope

All IFP products listed into the feed catalogue 1017/2017 (Number 11.3.x) that are produced in countries members of the Council of Europe.

Objectives (within the product and geographical scope)

- Achieve the most supportive and least negatively impactful policy and regulatory environment for our sector (e.g. safety, BREF, PAP, organic farming, Farm to Fork, etc.).
- Proactively drive the sustainability agenda of IFP producers in Europe and raise awareness about it (e.g. develop new standards, practices, indicators, etc.).
- Be the reference for quality of the products (testing methodologies, harmonized quality indicators, scientific reports and studies, ring tests, etc.) and promote it (e.g. quality logo).
- Assess, build the knowledge base and compare different inorganic feed phosphates using the most relevant parameters (e.g. digestibility, availability, etc.)
- Share good practices on improvements related to resource and process efficiency, as well as on products quality and safety.
- Ensure fair (from an environment, safety, quality and competition perspective) trade conditions and the overall competitiveness of the sector.
- Boost the visibility of IFP as a credible and objective reference on safety, quality and sustainability of sources of phosphorus.
